Development Fees and Charges – Building

Projects may require multiple fees, depending on the scope and complexity. Please contact the Permit Center for a fee estimate. All review fees shall be paid before an application is deemed complete. Issuance of a permit or approval may be withheld until all fees have been paid.

Electrical permits are issued by the Washington State Department of Labor & Industries.

Building Permit Fees

Building permit fees are based on the value of the work for which a permit is required. For new construction or additions, the value is estimated by multiplying the square footage by the corresponding rate in the current International Code Council *Building Valuation Data* table. Applicants will need to know the proposed occupancy and construction type.

Separate mechanical and plumbing permits are required for any new construction, additions, or alterations.

<i>Total Valuation</i>	<i>Base Permit Fee (Plus Applicable Plan Review and State Fees)</i>

Construction Valuation Table

The City of Mukilteo uses the current International Code Council (ICC) *Building Valuation Data* table⁵ to estimate the value per square foot of various types of construction when an actual value is not available. This table can only be used for new structures and additions; alterations and repairs are required to use the actual value of construction. The ICC *Building Valuation Data* table is updated twice a year in February and August. When the value provided does not include both labor and material, the City may double the value for the purpose of calculating permit fees.

Outside Vendors

The City will use an outside vendor for copying or scanning services when the City cannot scan or copy large (larger than 11" x 17") or nonstandard records with its own equipment, or when the City, in its discretion, determines that use of an outside vendor would be more cost- or time-efficient. In this case the City will charge the requestor the actual costs incurred from using an outside vendor, as determined by the vendor's final bill or invoice.

Customized Service Charge

In addition to the fees above, the City may impose a customized service pursuant to RCW 42.56.120(3).

Cumulative Fees

The fees above may be combined to the extent more than one applies to a particular request.

Alternative Fees

The City may, in its discretion, choose to impose a flat fee of \$5.00 as an alternative to the fees above if it reasonably estimates that a request will incur more than \$5.00 in fees. The City may also enter into mutual agreements with requestors that provide for alternative fees and/or clarify the details of fee payments.

Deposit

The City may require a requestor to supply a deposit of up to 10% of the estimated fees for the request, including any applicable customized service charge.

Waiver

In addition to the waivers above for agendas and packets, the City will waive fees when the total fees for a request (including all installments) are less than \$5.00. The City will also waive fees when the requestor is a federal, state or local agency.
